

# Strong data security simplified

Seamlessly manage and monitor removable media with Squadra Technologies and Microsoft

Despite a surge in cloud security, organizations continue to combat data breaches

## \$3.86M

The global average cost of a data breach is \$3.86 million.\*

## 5%

Only 5 percent of a company's folders are protected.\*

## 11M

On average, every employee has access to nearly 11 million files.\*

## Unchecked removable media provides pathways for data leaks

### Vulnerable network perimeters

Removable media devices, such as smartphones, flash drives, and tablets that remain unmonitored and unmanaged leave companies susceptible to data theft.

### Fragmented security posture

Many security solutions are unable to report complete file paths for data that has been copied from a network, creating holes in the security analysis.

### Limited time and resources

Adopting a separate framework to monitor removable devices can mean lengthy deployments and steep learning curves that security teams don't have time for.

## Protect your network perimeter with Security Removable Media Manager (secRMM)

### Monitor sensitive data

Gain advanced forensic analysis with secRMM's unrivaled security auditing and monitoring to combat unlawful and/or unauthorized disclosure of sensitive information.

### Maintain complete control

Control the who, what, where, when, and how of data using simple authorization policy rules when copying from your network to removable media devices.

### Integrate existing systems

Easily integrate secRMM with your existing Microsoft frameworks and technologies, eliminating the need for a separate framework to monitor removable media devices.

## Discover the combined power of Squadra and Microsoft

Explore Windows DLP security products that integrate seamlessly with Microsoft Azure Security Suite.

Complement Microsoft's endpoint protection strategy with Squadra's secRMM, a plug-and-play DLP.

Squadra is a Microsoft Intelligent Security Association (MISA) partner as well as a Microsoft System Center Alliance Partner.
