Security Removable Media Manager

Software Solution to Control and Secure Removable Storage

Removable storage devices provide convenience and efficiency. Unfortunately, these devices can be a real threat, leaving companies susceptible to data theft. Squadra Technologies', secRMM, provides organizations the perfect tool to securely manage data assets while at the same time permitting productivity with the use of these devices.

secRMM's simple authorization policy rules allows organizations to control the who, what, where, when, and how of data copied from their network to removable storage devices. In addition, secRMM's detailed monitoring provides organizations advanced forensic analysis to combat unlawful and/or unauthorized disclosure of sensitive information.

Secure the Advantages

- Detailed auditing/monitoring of removable storage device activity
- Auditing includes complete source file path (local drives & network shares)
- Monitors all storage devices including Mobile (smart phones/tablets), USB thumb drives, encrypted drives, CD/DVD, external hard drives & SD cards
- Logs failed & successful file copy operations providing the who, what, where, when & how
- Simple deployment: no additional framework required
- Microsoft Integration: central management, monitoring, & reporting using Microsoft System Center and/or Active Directory
