# secRMM

## Security Removable Media Manager

### secRMM Simple and Convenient Policy Rules

secRMM allows organizations to rest easy knowing that data held within their network is not susceptible to unauthorized copy/transfers. secRMM provides unprecedented protection through the configuration and implementation of policy rules.

No longer do agencies have to rely on written policies and procedures to limit the use of the USB port. With secRMM agencies can actively manage, secure and audit the USB port internally.

#### secRMM Policy Rules:

- Directories (prohibit the transfer of files from specific directories)
- UserID
- Serial Numbers (device serial number)
- Internal ID's (Device Vendor IDs and/or Product IDs)
- Programs used to perform write operations
